valence of this dire disease in almost all sections of the country; east and

west, north and south. That one special type of disease should prevail, in

all temperatures and conditions of cli-

mate, and with all possible variations

of food and management, is, one would rationally think, beyond the range of

credibility. We have recently had our

attention called to this subject, and the

only conclusion at which we can arrive is, that while hog cholera is said to exist about everywhere, the name given

is applied to all forms of disease-

whether of the lungs, the intestines the blood, bone or the muscle. Among many varieties of fatal diseases now

prevalent among hogs, worms are in some of our best districts the most-ac-

tive agents of disease and death. Many

cases have, within a few weeks, been reported to us at the Stock Yard by

have been found committing sad havoc.

who has about 700 hogs feeding, tells

us that some few weeks since, after

more or less sickness among them,

forty-three died in two days, and when

cut open they were found intected

and a half inches in length. Those in

cation. He at once procured some to

bacco, boiled it down, and then mixed

hogs. There were at this time three

very sick and in the last stages of life,

but they had no sooner taken the mix-

the prepared food .- From Griffith's
